Data sheet

Experience Better Living.

Reversible air-to-water heat pump for indoor installation.

Heat pump white textured (similar to RAL 9003). Heat pump for heating and cooling with inverter control for indoor installation and integrated heat pump manager WPM Touch with touch display. The specially designed basic construction enables it to be brought into the building with ease. The top evaporator unit can be separated from the bottom compressor unit for transport (extraction of the refrigerant by service required for a fee). Dirt trap and flow rate monitoring built in. Use of load-variable tariffs (SG Ready) High coefficients of performance (COP) through high-performance evaporator, electronic expansion valve and compliance with the requirements of EN 14511 for larger volume flows on the heat consumption side. Variable installation thanks to air intake from the rear, flexible air outlet to the right, left or top, and the option of making the hydraulic connections from right to left. Universal design for low-temperature heating systems with flexible expansion options for: At an external temperature of -10 °C, the maximum flow temperature that can be achieved is 56 °C. Sound-optimised through the use of slow-running EC 3D radial fan, an encapsulated compressor housing and a free-swinging compressor baseplate for solid-borne sound insulation. Room temperature control via Smart RTC (special accessory) Distribution systems with unmixed and mixed heating circuits High operational safety through sensor monitoring of the refrigeration circuit with demand-based defrosting, integrated thermal energy metering (display of the calculated quantity of thermal energy for heating and domestic hot water preparation on the heat pump manager). Flow and return sensor integrated, external sensor (standard NTC-2) in the scope of supply. Bivalent or bivalent-renewable operating mode The integrated air circuit with 90° air deflection enables installation in a corner without air ducts or wall installation with air ducts on the air outlet side.

Technical Data

Order reference	LI 16I-TUR
Sound pressure level in 1 m (indoors)	43
Maximum electric power consumption	4.9
Dimensions of air duct entry	726 x 726
Energy efficiency class with 35 °C flow temperature	A+++
Air duct outlet dimensions	552 x 355
Energy efficiency class with 55 °C flow temperature	A++
cos phi	0,99
Seasonal space heating energy efficiency in average climate conditions (NT)	188
Air outlet	Right / left / top
Seasonal room heating energy efficiency (high temperature)	145
Connection voltage	3/PE ~400 V, 50 Hz

Data sheet

Experience Better Living.

Order reference	LI 16I-TUR
Dimensions (W x H x D)**	750 x 1570 x 880 mm
Weight	235 kg

* Heating and cooling capacity and coefficients of performance (COP/EER) in accordance with EN 14511

** Please note that additional space is required for pipe connection, operation and maintenance.

*** The fuse protection must be designed as an all-pole disconnecting device (common disconnection of all phases)!

Important notice

The combination of components and the specified quantities represent a non-binding example system that must be reviewed and, if necessary, adjusted individually.

The pumpsizing needs to be checked according to the system's pressure loss and the minimum heating water flow rate of the heat pump.
